Super Outdoor Expo partners announce date change due to weather

FORT WORTH, Texas – The three-day ‘Super Outdoor Expo’ has been reduced from three to two days due to the recent inclement weather. The expo will now run Feb. 4-5, with site preparations beginning at noon on Feb. 3, which was the original start date. The event will still be from 10 a.m. to 4 p.m. at West 7th Street and the Trinity River (duck pond) near downtown Fort Worth.

In conjunction with other events associated with Super Bowl XLV, local, state and federal agencies have partnered with the US Army Corps of Engineers to provide a free opportunity for the public to experience several outdoor activities. Examples include fishing, shooting sports, archery, a “dino-dig” kids corner, camping demonstrations and mountain biking.

Participants can also learn about reptiles and other wildlife, migratory birds, state record fish, hydropower, disaster response, water resources and flood risk management, careers in science, technology, engineering and math (STEM) and much more.

The Expo is open and free to the public and will provide area residents and visitors an opportunity to discover outdoor activities and programs available in the area. Partners include Fort Worth Parks and Community Services, Texas Parks and Wildlife Department, US Fish and Wildlife Service, US Army, and Our Lands and Waters Foundation.

Texas has numerous parks, lakes, rivers, and other outdoor venues, and all the partners want to encourage everyone to safely enjoy the outdoors and conserve their public lands, natural resources and heritage.

For general information on the Expo call US Army Corps of Engineers, Fort Worth District, at 817-886-1222.
