

FACT SHEET  
CONSTRUCTION, GENERAL  
(CONTINUING AUTHORITY PROGRAM-SECTION 205)

PROJECT NAME AND STATE: Kelly USA, San Antonio, TX

AUTHORIZATION: Section 205, Flood Control Act of 1948, as amended.

<u>SUMMARIZED FINANCIAL DATA:</u>	<u>Plans &amp; Specs</u>
Estimated Federal Cost	\$ 350,000
Estimated Non-Federal Cost	0
Total Estimated Project Cost	350,000
Allocation thru FY 2004	42,000
Budget Request for FY 2005	0
Allocation for FY 2005	0
Budget Request for FY 2006	0
Balance to Complete After FY 2006	0
Amount That Could Be Used in FY 2006	350,000

LOCATION AND DESCRIPTION: The project is located along Leon Creek within KellyUSA, formerly Kelly Air Force Base (AFB), about 7 miles southwest of downtown San Antonio in Bexar County, Texas. The specific problem site is located in the east overbank of the Leon Creek floodplain, immediately downstream of Military Drive (Loop 13), in the southern portion of the former Kelly AFB.

ALLOCATIONS FOR FY 2005: We do not anticipate receiving any funds for this project in FY 2005.

APPLICATION OF THE AMOUNT THAT COULD BE USED IN FY 2006:  
FY 2006 funds would be used to complete plans and specifications.

ISSUES AND OTHER INFORMATION: KellyUSA has experience recurrent damages from flood events of Leon Creek. The area most vulnerable to these flood events is the Jet Engine Test Cell Complex. The primary work activity of this complex is the after-overhaul performance testing of jet engines. Since this is one of only two facilities in the United States that conducts this type of work, the output from this facility is considered of high importance. Flood damage reduction features may include, but are not limited to, upstream detention; repair and/or replacement of an existing levee; buyout and removal of flood prone properties; flood warning system; and channelization or diversion of Leon Creek.

ADMINISTRATION POSITION: The Administration supports this project.

CONGRESSIONAL INTERESTS: Congressman Gonzalez, TX-20 and Cuellar, TX-28.
