

Chacon Creek, Laredo, Texas

Purpose: The project would provide flood risk management and ecosystem restoration to Chacon Creek, located in the eastern part of the city of Laredo, Texas. The flood risk management component of the project will consist of the permanent evacuation of houses predominantly in the Villa Del Sol subdivision adjacent to Chacon Creek where residents have experienced frequent inundation. The ecosystem restoration component will address the loss of wetland habitats and vegetation brought on by additional water flowing into Chacon Creek due to increased urbanization.

Sponsor: City of Laredo

Congressional District: TX-28 Cuellar
