

# **Spring Lake Aquatic Ecosystem Restoration, San Marcos, Texas**

**Purpose:** The recommended plan would restore valuable aquatic and floodplain habitats throughout the Spring Lake area, which have been degraded by the construction, operation, and existence of the Aquarena Center, the surrounding golf course, and other urban developments. The restoration project would help restore and protect sensitive habitat for 5 Federally listed species.

**Sponsor:** Texas State University, San Marcos

**Congressional District:** Cuellar, TX-28
