

# Old Trinity River, Channel Wildlife Restoration, Dallas, Texas

**Purpose:** The recommended plan consists of restoration of 23.93 acres of emergent wetlands, improvement of the quality of the habitat on 28.42 acres of bottomland hardwood and mixed deciduous forest stands, and reforestation of 53.48 acres of open space to bottomland hardwoods. The recommended plan also identified the relocation of a pedestrian bridge and a recreation hike and bike trail.

**Sponsor:** City of Dallas

**Congressional District:** Johnson TX-30
