

Upper Colorado River Basin, Texas

Purpose: Scarcity of water, particularly in-stream flow, has degraded portions of the diverse aquatic and terrestrial ecosystems of the basin. The study will evaluate measures to increase the supply of water for the ecosystem, municipal, and agricultural uses, as well address other water resource problems and opportunities, including flood risk management, water quality, and recreation.

Sponsor: Upper Colorado River Authority

Congressional District: TX-11 Conaway; TX-19 Neugebauer
