

Lower Trinity River Basin, Texas

Purpose: The study area encompasses the Trinity River Watershed below the confluence of the East Fork and the mainstem to Trinity Bay. The study area covers approximately 10,096 square miles and 460 river miles. The proposed new study will review previous studies within the watershed and develop a scope of work for a comprehensive watershed study focusing on ecosystem restoration, flood damage reduction, water quality improvement, recreation, and allied purposes within the watershed. The study will utilize a holistic watershed approach.

Potential Sponsors: Trinity Basin Conservation Foundation, and the Texas Water Development Board.

Congressional District: TX-2 Poe; TX-4 Hall; TX-5 Hensarling; TX-6 Barton; TX-8 Brady; TX-14 Paul; TX-17 Edwards
